

BOND Civil & Utility Construction, Inc. utilizes ConstructSecure to provide prequalification and safety tracking services. All subcontractors that perform work on BOND Civil & Utility projects are required to enroll in the ConstructSecure program and to provide and update their prequalification data as necessary.

All existing ConstructSecure subcontractor members can easily join BOND Civil & Utility’s prequalified list of subcontractors by:

1. Logging into your ConstructSecure account
2. Clicking the Company Information Tab
3. Checking the BOND box at the bottom of the page and clicking save

If your company is one of the few that does not have a ConstructSecure membership, please visit <https://app2.constructsecure.com/enroll/48/userProfile>.

- The “New Enrollment” screen will be shown.
- Complete the information and a username and password will be generated.
- You will receive a welcome email with your user credentials.
- Please be sure to complete the required safety and financial information.

There is a fee associated with being a member of the ConstructSecure program. However, we are confident that you will find the value that ConstructSecure offers its subcontractor members far exceeds the membership costs. Information on the subcontractor benefits can be found at www.constructsecure.com

The enrollment fees are as follows:

Free Plan	\$500k Plan	\$1M+ Plan
Contracting Partner Annual Revenue Less than \$500k	Contracting Partner Annual Revenue Between \$500k - \$1M	Contracting Partner Annual Revenue Greater than \$1M
First Hiring Client or Trade Type Free	Single Hiring Client Single Trade Type \$375 / year	Single Hiring Client Single Trade Type \$900 / year
Multiple Hiring Clients or Trade Types Free	Additional Hiring Clients or Trade Types \$375 / year, capped at \$750 / year	Additional Hiring Clients or Trade Types \$900 / year, with discounts above 2

To learn more about the program, ConstructSecure will be holding WebEx trainings throughout the month. You can register for training by contacting ConstructSecure directly.
